EDUCATION

- Bachelor of Science in Computer Science**, University of Florida, Gainesville, FL (Remote) May 2023
Projects: [MERN Stack Web App](#), [Compiler Model Implementation in Java](#) GPA: 3.98 / 4.00
- Master of Arts in National Security Studies**, Georgetown University, Washington, DC May 2018
Thesis: Explaining Military Intervention Under the Economic Community of West African States GPA: 3.86 / 4.00
- Bachelor of Arts in Peace and Conflict Studies**, Colgate University, Hamilton, NY May 2014
Thesis: Egyptian Civil-Military Relations and the 2011 Revolution GPA: 3.91 / 4.00

EXPERIENCE

- Tier 2 Support Technician**, U.S. Embassy Madrid, Spain Jun 2024 - Present
- Support a three-person team tasked with administering and maintaining the Embassy's classified network infrastructure and providing Tier 2 support to 50+ users working in secure spaces
 - Manage permissions and distribution roles for 239 users in an RBAC based Department of State system to distribute diplomatic cables to authorized users across classified and unclassified networks
 - Manage Active Directory user objects, security groups, and group policies for 50+ classified network users, including on average 20 account transfers and creations during the summer transfer season
 - Modernized classified network infrastructure by running 1000+ yards of new fiber and copper cabling, completing 300+ fiber and Ethernet CAT6 terminations, and replacing nine switches and 10 patch panels. Conducted an after-hours cutover to relocate core services to the new infrastructure, restoring connectivity for the next business day. Followed TIA-606-D diagram and labeling standards for cabling and network racks.
 - Collaborated with the Telephone Infrastructure team to add an additional circuit to Dept. of Homeland Security offices by identifying existing fiber runs and patching fiber connections across four floors to the demarcation point
 - Imaged and deployed 25+ new workstations on unclassified and classified networks, including a full refresh of unclassified workstations used by Defense Attache Office personnel
 - Ensured the smooth transition to Microsoft M365 cloud services on classified thin client systems by troubleshooting issues with Outlook profiles and M365 licenses and mapping users to printers
 - Managed annual inventory of classified IT assets; Ensured 100% item identification and corrected and standardized inventory locations to improve accountability and efficiency
- Software Engineer**, L3Harris Technologies, Herndon, VA / Remote May 2022 – Jul 2023
- Investigated and resolved orthorectification errors in regtools, an Iva-based image processing library used by 100+ company employees to transform satellite images accurately
 - Independently learned foundational image science concepts underpinning regtools functionality and applied knowledge to design new software solutions to image processing problems
 - Designed a system to orthorectify classified satellite imagery and import images into external software using Lua and Python, satisfying a senior government customer request
 - Developed, implemented, tested, and documented software solutions to customer requirements for new satellite image processing and analysis capabilities as part of a 15-person Agile development team
- Community Liaison Officer (CLO)**, U.S. Consulate General Amsterdam, The Netherlands May 2019 – Mar 2020
- Designed a personnel management system for 500+ members of the U.S. Mission to the Netherlands to ensure accountability during crises; Reduced time spent on CLO reporting by 92% while increasing accuracy by 10%
 - Produced an interactive map in Microsoft Power BI allowing users to quickly visualize U.S. Mission engagement throughout the Netherlands and prioritize engagement targets

- Collaborated with CLO team to manage an annual program of 35 events supporting U.S. Mission community needs

Desk Officer, Defense Attaché Service (DAS), *Defense Intelligence Agency (DIA)*, Washington, DC Jun 2016 – Jan 2019

- Managed the daily operations of the 9-person U.S. Defense Attaché Office (DAO) in Ankara, Turkey in a fast paced and high impact environment
- Designed data-driven processes to assess DAO operations and ensure alignment of DAO resources with analytic production requirements and key U.S. national security priorities
- Identified and corrected errors in DIA Headquarters datasets allowing DIA to accurately measure the performance of 86 officers across Europe and provide correct input to their performance evaluations
- Selected above more senior peers to evaluate and revise DAS HQ operational policies to ensure effective implementation and applicability to DAO operating environments

SKILLS and DISTINCTIONS

Certifications: GIAC Certified Incident Handler (Exam Score: 99%), OpenCV Fundamentals of Computer Vision & Image Processing in C++ (In Progress)

Programming: Proficient in Java, C++, SQL, Python | Familiar with JavaScript, MATLAB, Lua, R

Tools: Git | React | REST APIs | Oracle DB | Jira | Confluence | Bitbucket | Jenkins | Linux

Methodologies: Object-Oriented Programming | Agile | Scrum | Software Development Life Cycle

Active DoD TS/SCI Clearance
